in District Assembly 49, of New York, would be disposed of to-day.

These are the principal appeal cases, and if they are settled without a rupture the danger point of the Assembly will have been passed.

The Barry appeal is in the hands of one of his friends in the delegates, but it is said the Grievance Committee has considered the matter and that through their Committee it will be brought up.

The Grievance Committee has made a thorough investigation of the trouble in D. A. 49, of New York. It was said last night that the Committee would recommend a settlement on the basis proposed some weeks ago in New York of having the officers of both factions withdraw, local assemblies suspended since June 1 put back in good standing on payment of their dues, and to have the present efficers incligible to hold office in the District for two years.

efficers ineligible to hold office in the District for two years.

Such action would make the following ineligible: James E. Quinn, Edward E. Nunze, John Saunders, Timothy P. Quinn, Hugh Carey, Geo. F. Murry, John J. McKenna, John Hosey, George E. Duncan, Thos. B. McGuire, Phillip J. McGrath, William N. Reed, Michael Breslin, George W. Dunn, James J. Daly, Paul Mayer, Richard Raleigh, David J. Naughton, George J. Leffert and Charles J. Purcell.

NEITHER SIDE PLEASED. This agreement to the members of the "Anti-Home Club" would not be satisfactory, nor would it please the "Home Club" faction, of whom Quinn is the leader.

"If all the recommendations in his address are acted upon favorably, and there seems to be a chance to hold the Order together, he will be willing to continue in charge. On the other hand, if the Assembly does not see fit to put the power of the Order in one man's hands and make the other changes in government he suggests, he will let some other man have the burden of holding up the Order."

A public meeting, at which several of the leading lights of the Order will deliver addresses, is to be held some night before the close of the session. Powderly may possibly be one of the speakers.

Some of the delegates favor giving to the bress the full proceedings of the Assembly with reference to Barry's appeal. They say that, as Barry is in a position to answer, it is but just that the administration's side of the quarrel should be heard.

Barry will not be accorded the privilege of the floor in the Convention, but his position will be defended by Schilling, of Chicago; Skeffington, of Boston; W. T. Lewis, of the miners, and possibly one or two others.

Powderly will detend the action of the General Executive Board in expelling Barry from the Order. He is in excellent fighting tim and will give no quarter to the avowed enemies of the organization.

enemies of the organization.

It is generally believed that the action of the administration in suspending and then expelling Barry from the order will be sustained by a great majority of the representatives.

NIGHT AND TO-MORROW. The Threatened Cold Wave Has Come Up from the South on a Two Days' Visit, Causing Our Young Men to Bring Out Their Heavy Overconts-Prophetic Warn-

The cold wave has struck us at last. It tarted above Manitoba and moved southeast, and then came up on an Eastern tour.

Its presence was first felt in New York and the surrounding territory early last evening, when, after the rain, the thermometer began creeping down, until at 4 o'clock this morning it was bitter cold. From that time it began to ease up a little, and at 8 o'clock the thermometer on the roof of the big Equitable Building registered 36 degrees above zero.

The stolid citizens of this town thought the emperature about right, but the gilded youth thought otherwise. Indeed, there was a steady stream of young men in light overcoats and carrying suspicious-looking bundles under their arms, shyly dodging into certain shops of Park Row and the Bowery. The majority of the suspicious-looking bundles were found to contain dress suits, and when the gilded young man emerged from the establishment owned by his respected relative it was found that he had exchanged his light "top-coat" for something heavier and more comfortable.

A Broadway sporting-goods dealer was quick to take advantage of the cold snap, and he placed a choice assortment of toboggans out upon his sidewalk.

Sergit Dunn, of the United States Signal Service, was humming a stanza of "Spring, Gentle Spring," when the reporter called at his office on the Equitable Building this morning. youth thought otherwise. Indeed, there was

morning.

The windows were wide open, and the Sergeant wore a light alpaca office coat. The wind was rushing through the portholes in a gaie, and everything on the desks was held in place by huge paper weights.

'.' Call this cold?" asked Sergt, Dunn. The reporter's teeth chattered an answer that it was cold, and the (weather) wise man sent a cold chill down his visitor's spinal column by saying: saying: Wait until to-night; then it will be cold.

Wait until to-night; then it will be cold."
Continuing, Sergt Dunn said that the cold wave would probably last until Monday. From the reports that he had already received the centre of the blizzard would pass over this part of the country late this afternoon and during the evening. To-morrow it would be cold and fair.

The lowest temparature in the country was at Fort Chester, Mon., where the thermometer stood at 8 degrees below zero; the warmest, Point Jupiter and Key West, at 76 degrees, At Chicago the thermometer stood at 26 degrees above; St. Louis, 34 degrees; Moorhead, Minn., and Helena, Mon., 2 degrees below. At Jacksonville the people were walking about in their shirt-sleeves, with the thermometer at 58 above.

"One thing that should be appreciated," said the Sergeant, "is that to-day is the first clear Saturday that we have had in over two months. The reason for this, I suppose, is that the political parades are over."

The bridge cars and ferry-boats were in greater favor than ordinarily with the people who cross the big span. There were a few who ventured to "foot it." but they either turded back or arrived at the New York side with their blood half frozen.

SIR TIMOTHY IN TOWN.

What the Great Twirler Said of Ward and the Bostons

Tim Keefe, the great pitcher of the New York aseball Club, arrived in town a day or two ago in company with his sister, Miss Keefs.

But very few of Tim's friends knew he was in town, for he has been quietly engaged in showing his elster the sights of the city, it being her first

town, for he has been quietly engaged in showing his sister the sights of the city, it being her first visit to Gotham.

An EVENING WORLD reporter met the great twirier, and as Tim was but just come from his home in Cambridge he was, of course, fresh from the basebail rows of Boaton.

Among the questions of the day that are debated at the Hube is the one relative to Ward's release and his probable purchase by Connat, Billings & Co. Cancerning the Werd question, Keete said:

"I wish it understood, once for all, in New York, that I never used the words credited to me by two New York papers, that unless Ward's fit the New York Club I would demand my release.

"I never asid anything which could lead any one to suppose for a moment that I had any such intention. On the contrary I am most anxious, for many reasons, that Ward should play with us again next year. My chief reason is that should Ward secure his release and go to Beston it would create mined dissatisfaction among the other members of the Club, because such a change would materially increase Ward's salary.

"Now, there are other members of the Club who have played as good ball as John Ward, and they think that if Ward is worth more money for a season's work, they, too, deserve an increase. Therefore, I hope that Ward will remain here."

Concerning the matter of ward's acknowledged poor play, the past season, Keefe said: "Ward did the best he could under the circumstances. I haven't any fault to find with the support he gave me. His work in the St. Louis series could not be equalled by any shortstop in country, and his worst enemy, if he has one, will tell you the same hing."

Waen asked if he thought Boston would pay

If the statements of alleged eve-witnesse are true, the police of the Seventeenth Precinct, of Brooklyn, committed an unprovoked attack upon two defenseless women during the fight with the mob which gathered about the railroad stables at the western terminus of the Nostrand avenue line on Thursday. Several of the Nostrand avenue railroad employees board and lodge at Mrs. Grogan's house, and were there when the trouble occurred on Thursday at the time the Flatbush Company attempted to run out a car. One of these boarders. W. J. Coneys, a conductor on the Nostrand avenue line, said to-day that he was asleep on the second floor of the house, when he was awakened by a floud noise, and hastily looking out of the window, he saw the police driving everybody before them, and saw five of the officers enter the front door.

He also saw Stephens strike Mrs. Hughes, and she fell fainting to the floor. Another officer dragged Stephens out of the house and asked him why he struck the woman, but Stephens gave no answer.

Mrs. Hughes's four-year-old child was so badly frightened by the officers that it is confined to its bed.

All is quiet to-day on the lines of the Flatbush Company, both sides awaiting the decision of the State Board of Arbitration, and both declaring that in the event of it being against them they will not abide by it.

First to be filled will be the Commissionership of Public Works, for it is generally conceded that Gen. Newton will not remain in office a minute after Grant is seated in the Mayor's chair.

His probable successor has been announced by The Evening World—Thomas F. Gilroy, Deputy County Clerk.

But the richest plum in Mayor Grant's gift will be the office of City Chamberlain, now occupied by Wm. M. Ivins.

The man who succeeds Mr. Ivins will draw a salary of \$25,000 yearly, and there are a goodly number who would like so ples ant an employment.

Among others mentioned are President J. Edward Simmons, of the Board of Education, and State Bank Examiner Willis S. Paine.

It is not probable that Gen. Fitz John Porter will be kept longer in office, and his successor as Fire Commissioner is not unlikely to be ex-Register John Reilly, with a possibility of the selection of the present United States Marshal, Gen. Martin T. McMahon, for the place.

Ex-Judge Joseph Koch is expected to be returned to the Dock Board, as a reward for his work against his old friends, the Counties, and in favor of the Tammany ticket.

Congressman Cockran, who, with his partner, Wm. H. Clark has been the legal adviser and counsel of Sheriff Grant during his term of office, may continue to act in that capacity for Mayor Grant by accepting the appointment of Corporation Counsel. Ex-Assistant District Attorney De Lancey Nicoll is also spoken of for the position.

Flora Smith, the young Hungarian woman who was taken sick with what was at first supposed to be yellow fever, at 117 Allen street, died in Bellevue Hospital this morn-

what the girl's disease was, and were at last obliged to send for Dr. Biggs, the eminent pathologist.
Dr. Cyrus Edson said this morning that

Dr. Cyrus Edson said this morning that Dr. Dillingham, of his staff, had diagnosed the case at the girl's house last night as not being a case of yellow fever.

"What was it then?"

"We do not know. After satisfying ourselves that it is not a contagious disease of any sort, we drop it."

"Was the girl removed to the Willard Parker Hospital?"

Parker Hospital?"

'She was not. The morning papers are mistaken in saying she was. We had her sent to Bellevue." he concluded.

Miss Smith was received at Bellevue at 7 o'clock last night. She was suffering intensely. Fearing that she might have at least the germs of disease about her, Warden O'ktourke very wisely decided to isolate her, and with that end in view she was put to bed in a cell in the female prison remote from any one.

Dr. C. A. Smith attended her. He worked with untiring zeal, but despite his best efforts the woman died, as stated.

chestnut venders. There was a passage-way for trucks, but the bold purveyors of the roasted symbol of tiresome iteration had massed themselves solidly across the way.

Without a word of warning or a monitory crack of his whip, with nothing but a malevolent twinkle in his African eye, the big driver calmly drove his solid beasts straight into the rear of a chestnut establishment.

The chestnut man shot forward with sudden vehemence, taking his stand literally against the untimely inroads into his business.

With a sharp patter like April rain in Vallambrosa the warm, soft chestnuts pattered tumultuously over the flags.

With an expression on his face that indicated a willingness to violate several precents of the Decalogue at once the Ralian circled around with a movement more rapid than dignified. He glared up at the driver. The driver glared down at him with an air of righteous indignation.

He didn't say anything, but held the chestnut merchant with his glistering eye as if in expectation of some wild Italian protest. But the general bigness of things in the driver's outfit, including the bulky solidity of the driver himself, awed the vender into a philosophic silence.

Whon he came out again to where his sister was sitting he told her that he had taken a dose of morphine.

Thinking he was joking, Mrs. Rogers did not take his astonishing announcement seriously until a short time later, when he showed signs of filness.

Dr. Flynn stuck to his statement that he had taken morphine and Mrs. Rogers, becoming alarmed, sent at about 8 o'clock for Dr. H. A. Shelley, who lives at 352 St. Nicholas avenue, a few doors away.

Dr. Shelley no sooner made an examination of the patient than he was convinced of the seriousness of the case, and three more doctors were summoned. One of these was Dr. J. W. Flynn, of 146 East Seventy-fourth street, the patient's brother.

Waen asked if he thought Boston would pay enough money to secure Ward, Keefe replied: "I am almost sure that Boston will pay \$15,000 for his release, and the signing of Brouthers strengthens my belief, for now Morrill is sure to go elsewhere and Bogton will need a captain.

"Brouthers's name on a Huo contract, by the way, makes another thing ocratin, and that is that Descon White will play in a town other than Boston, because, the big four combination being broken, White won't get the money he wants."

Speaking of Charley Bennett, Reefe expressed timself in the highest terms of that cather's ability and earnestly hoped New York would succeed in securing him for next year.

Teachers Providing for the Time When

ers' Benefit Association of the City of New York.

It is a society composed of teachers employed in the public schools of this city and its object is to render pecuniary aid to all members who shall become either mentally or physically incapacitated for school work.

All female members, after a term of service of thirty-five years, and all male members after forty years' service, may be retired and receive 50 per cent. of his or her yearly salary, but no annuity shall exceed \$600.

The Association is now in the second year of its existence, and has over 1,600 members. The amount of dues is fixed according to the salary received by each member. For instance, a member receiving a salary of \$1,000 or less pays 1 per cent of what he receives. Members receiving over \$1,000 are assessed \$10 on the 1,000, and 50 cents additional for each additional \$100, but no member is assessed more than \$20 per year.

Dues are payable monthly.

The hearts of the members were made happy a year ago by the receipt of \$3,000 from some unknown source.

The money was handed to the Treasurer with the strict understanding that the donor's name should be kept secret, and it has been. Outside of the \$3,000 contribution nothing has been received from any outside source.

He shouldn't have blocked the way, and the driver had a right to give him some genial intimation of his desire to run over and annihilate him, but the driver wasn't gaitered that way.
